Wafae Hamdaoui

Web & mobile development engineer

Profile

As a fifth-year student in web and mobile development engineering, I am fueled by a passion for the world of web and mobile applications. My insatiable curiosity drives me to constantly explore new ideas and trends in this field. I am characterized by my versatility, adaptability, and commitment. Currently, I am seeking a six-month internship opportunity to gain practical professional experience and apply the knowledge I have acquired during my five years of education.

Projects

MyUemfResource

This is a web application developed with Nodejs which allows students to reserve the various university resources (UEMF) either sports halls, sports fields, work spaces or computers.

RiadFes

This is a web application developed with the Laravel framework that allows visitors to view and reserve rooms in different riads in Fez. This app could be very useful for tourists looking for accommodation in the historic city of Fez, Morocco.

AliAcademy

It is an online learning (e-learning) platform that allows users to view different courses and training , as well as purchase them.

KenzFes

This is an e-commerce web application for artisans in the Medina of Fez, to manage a set of tasks facilitating the purchase of products online without traveling on site.

Site Portfolio

This is a static website that was created to:
- Define the training and experience of a gynecologist,
- Promote medical practice.

Workshops

5th Edition of ALTEN MOROCCO SOFTWARE AWARDS

I managed to come in second place in the competition with my ALIBIKE project.
It is an intelligent and eco-responsible bicycle composed of an electric part, which allows mechanical energy to be channeled to maintain movement without human intervention, and another intelligent part which consists of providing a GPS system and sensors Remote measurement video to identify obstacles for cyclists.

Hackathon organised by Webhelp Morocco and l'UEMF

I took part in a hackathon focused on improving employee retention, aiming to build cohesion, increase engagement and cultivate a sense of belonging within teams.
